

AdminStudio Suite

Powering the Daily Application Readiness Process for Inventory, Rationalization, Packaging, and Compatibility Testing of Physical, Virtual, and Mobile Applications, Ensuring Faster Service Delivery and Predictable Deployment.

Benefits to Your Organization:

- **Improved IT Responsiveness** — Streamline service delivery and respond quickly to new request.
- **Increased Operational Efficiency** — Reduce the time and effort involved in packaging applications and manage one process for planning and delivery of physical, virtual, and mobile applications.
- **Predictable Application Delivery** — Ensure supportability of your software portfolio and maintain applications in a state of readiness for deployment into increasingly complex environments.
- **Computing Platform Agnostic** — Eliminate labor-intensive data gathering and allocate resources more efficiently across all platforms used to deliver applications, whether physical, virtual, or mobile.
- **Adaptive and Scalable to Changes in Business Priority** — Automate IT service delivery and planning for every day application requests and migration projects.

AdminStudio Suite powers an enterprise’s daily Application Readiness process for inventory, rationalization, packaging, and compatibility testing of physical, virtual, and mobile applications, ensuring faster service delivery and predictable deployment into increasingly complex computing environments. Automation, integration with leading software distribution tools, and workflow capabilities streamline day-to-day application packaging operations and reduce the time and cost of application virtualization, mobile application management, and Windows upgrades.

Increasingly Complex Computing Environments

In today’s digital business, it is important to keep applications ready to deploy when end users need them and on the devices they choose. But the increasing complexity of enterprise environments is posing a challenge for organizations that are looking to improve service delivery and consumerize IT services. The heterogeneity of computing devices, more frequent software releases, and ongoing transition of the computing infrastructure from physical to virtual and mobile, complicate things further. Manual procedures for rationalizing, testing, converting, managing, or distributing enterprise software are no longer viable.

Continual Application Readiness

The Application Readiness processes allows you to shift from reactive to proactive application management. The result is it’s ability to define, track and deliver the speed and quality of service delivery the enterprise expects. The Flexera Software solution is a source of significant benefits for many groups within the enterprise and for the business as a whole.

“AdminStudio enabled me to automate the delivery of applications, reduce operational costs, and transition from a reactive to a proactive mode for managing applications and migrations.”

Bruno DAmico
 - End User Computing Manager
 Yellow Pages Group

- IT leaders can significantly reduce the cost and complexity of major service transitions and increase the ability to adapt and scale in response to changes in technology and business needs.
- IT operations managers can increase predictability, in terms of outputs and measurements, to accurately scope and budget for transitions so there are no surprises.
- IT service delivery managers can exceed SLAs and deliver applications to the business faster and more reliably.
- Employees, customers, and partners get faster and more reliable access to the latest technology, without outages or interruptions in service.

Figure 1: With AdminStudio Suite, IT can automate the Application Readiness process to achieve continuous readiness of all applications.

Microsoft Partner
 Gold Application Development

AdminStudio Suite includes:

- **AdminStudio**
Package software for scalable enterprise deployments
- **AdminStudio Application Compatibility**
Identify and resolve application compatibility issues
- **AdminStudio Mobile**
Identify mobile app risks and compatibility issues
- **AdminStudio Virtualization**
Package software into application virtualization formats
- **AdminStudio Inventory and Rationalization**
Identify, assess, and consolidate the enterprise desktop application portfolio
- **AdminStudio Virtual Desktop Assessment**
Assess and plan for Virtual Desktop Infrastructure (VDI)
- **Workflow Manager**
Manage Application Readiness requests and track service level agreements (SLAs)

Future Proof Your Applications with AdminStudio Suite

AdminStudio Suite is the industry's only automated application compatibility testing, fixing and packaging solution for MSI, virtual, and mobile formats that integrates with existing systems management and mobile device technologies. This sophisticated solution enables you to unify application management using one tool, with one process, regardless of deployment format. As a result, you will reduce application sprawl, and accelerate the adoption of virtualization, cloud computing, mobile apps, and the next Windows OS update. And you'll position IT to maintain Application Readiness in an environment of rapid and continual change.

Figure 2: Application Readiness Maturity Model helps chart a path to higher levels of business value.

The Application Readiness Maturity Model provides a framework for continual improvement of the Application Readiness process. Use it as a guide to assess the current state and determine what can be done to improve the process. By understanding where your organization is in maturity, you will have a starting point to chart your path to higher levels of business value. Each step yields incremental efficiencies, and capabilities resulting in faster and more reliable application delivery, lower costs, and decreased risk.

Key Product Features by Edition

AdminStudio	Enterprise Automate Continual Application Readiness	Professional Package and Test for Best Practices	Standard Basic Software Packaging
Repackage applications for Windows Installer	✓	✓	✓
Create transforms to customize Windows Installer packages	✓	✓	✓
ISO 19770-2 Software Tagging	✓	✓	✓
App Portal Limited Edition (5 applications)	✓	✓	✓
Centrally Manage Applications	✓	✓	
Improve the Speed and Consistency of Packaging with Automatic Documentation	✓	✓	
Test Applications for quality, conflicts and best practices	✓	✓	
Distribute applications to enterprise software deployment systems	✓	✓	
Bulk Import from System Center Configuration Manager	✓	✓	
InstallShield 2015 Professional - AdminStudio Edition		✓	✓
InstallShield 2015 Premier - AdminStudio Edition	✓		
Manage System Center 2012 Configuration Manager Application Metadata	✓		
Test Impact of Windows Security Patches	✓		
Detailed Application Reports and Dashboards	✓		
PowerShell APIs	✓		
Integration with App Portal and FlexNet Manager Platform	✓		
Application Virtualization	Enterprise Test and Convert Applications in Bulk	Professional Test for Virtualization Suitability	Standard Convert Single Applications
Virtualize Applications for: - Microsoft App-V - VMware ThinApp - Symantec Workspace Virtualization	✓	✓	✓
Automated Application Converter	✓	✓	✓
Directly Edit Microsoft App-V Packages	✓	✓	✓
Application Virtualization Suitability Testing	✓	✓	
Quality, Conflict and Best Practice Testing of Virtual Applications	✓	✓	
Define Microsoft App-V Virtual Environments	✓	✓	
Prepare App-V Applications for Faster Delivery	✓	✓	
Upgrade App-V 4.x Virtual Applications to App-V 5.0	✓	✓	
Automatically distribute App-V packages to App-V Management Servers	✓	✓	
AdminStudio Virtual Desktop Assessment Limited Edition	✓	✓	
PowerShell Application Programming Interface (API)	✓		

Key Product Features by Edition (cont'd)

AdminStudio Mobile	Enterprise Test for Risk and Device Compatibility	Professional Import and Deploy Mobile Apps
Streamline Delivery of Mobile Apps Through the Application Readiness Process	✓	✓
Test Mobile Apps for OS Compatibility, iOS, Android and Universal Apps	✓	✓
Test Mobile Apps for Device Compatibility	✓	
Identify Risky Apps with Mobile Application Reputation Scanning	✓	
Mobile App Dashboard and Reporting	✓	
PowerShell Application Programming Interface (API)	✓	
AdminStudio Application Compatibility	Enterprise Test and Remediate Applications in Bulk	Professional Test and Remediate Single Applications
Windows 10, Windows 8, and Windows 7, Application Compatibility Testing and Remediation	✓	✓
Automated Internet Explorer Compatibility Testing	✓	
Automatically Detect and Remediate Windows Server Compatibility Issues	✓	
Compatibility Testing Application Programming Interface (API)	✓	
Detailed Application Portfolio Compatibility Reporting	✓	

About Flexera Software

Flexera Software helps application producers and enterprises increase application usage and the value they derive from their software. Our next-generation software licensing, compliance and installation solutions are essential to ensure continuous licensing compliance, optimized software investments and to future-proof businesses against the risks and costs of constantly changing technology. Over 80,000 customers turn to Flexera Software as a trusted and neutral source for the knowledge and expertise we have gained as the marketplace leader for over 25 years and for the automation and intelligence designed into our products.
