

Leading Industry Standard Software Development Tools for Copy Protection, Licensing & Online Sales Automation, Delivered with “We’re Here to Help” Service

Empowering Developers Everyday
Since 1993

Protection PLUS™

A Powerful, Flexible, Software Licensing Toolkit

Protection PLUS software is the industry standard for software licensing and copy protection. It is your key to protecting your investment in your intellectual property and puts you in the driver's seat to distribute and sell your software.

Popular Features

Software Access Management

- Create trials, rentals, and pay-per-use applications
- Immediate software activation via phone, fax, email, or the internet
- Extend a trial, rental or lease for an additional period of time
- Disable fraudulent purchases
- Allow partial access; activate additional features later

For Networks

- Convert from single-user mode to multi-user mode
- Protect using either fixed or floating network licensing
- Modify the number of allowed network workstations

Thousands of
Happy Customers

Customer Tested and Approved

With an amazing range of functionality this powerful toolkit meets a wide range of customer needs. Protection PLUS is working tirelessly for over 5000 customers in 118 countries and protecting hundreds of millions of dollars of software.

Protect

With the Protection PLUS software licensing toolkit you can protect your software, create trial versions, implement Electronic License Activation and so much more.

Build

We can help you build very complex customized solutions to meet the most demanding business requirements. Our small company size with big company standards allows us to offer customization services that large companies simply don't offer.

Automate

Electronic License Management allows you to maintain control of your software after it leaves your possession. Automate the disbursement of software updates while optionally collecting usage information and verifying that a customer's license is still valid.

The Best E-Business Option for License Automation and Distribution

The real fun starts when you use SOLO (Secure Online License Ordering) Server to automate the operations of an online software business 24/7.

Millions of Successful Transactions

Testimonials

"We love this software & their great customer support is awesome!"

- *ProCetus Engineering Software Inc., Panama*

"You are one of the rare software utility companies that we work with that still seems to care about its customers."

- *Randy H., Colorado*

"Concept Software [has] world-class customer support and proven operational excellence, Concept Software ensures complete satisfaction with every order. What convinced us was the complete array of features of SOLO Server along with Concept Software's tremendous customer support that is essential to maintaining your business."

- *Jeff Huhn, CEO NewStream Solutions*

"I just wanted to let you know that we are so pleased with your product and your services. It really makes our ordering process seem so much more professional."

- *Kim Roberts, Frogware Software LLC*

"Thank you. This is BY-FAR the best support I have received from any software company in a long time. And I deal with a lot of different companies! KUDOS."

- *Mark Toth, Maxus Strategic Systems*

"...SOLO Server [has] processed thousands of visits and tens of thousands of dollars of purchases without a flaw or a system slowdown, we relaxed. Now, it's business as usual no matter how hard we are hit by orders or customer queries."

- *Jambalaya Brands, Inc., St. Louis*

"Best damn product I own." - *Chris C.*
