

erwin DM r9.7 erwin Data Modeler Comparison Matrix

erwin® Data Modeler is an industry-leading data modeling solution that provides a simple, visual interface to manage your complex data environment. erwin® Data Modeler Standard Edition is an industry-leading data modeling solution that allows you to manage enterprise data through an intuitive, graphical interface. erwin® Data Modeler Workgroup Edition is designed for collaborative modeling for teams of data modelers. It provides conflict resolution, versioning, security and standardization for multi-user modeling. Through a central model repository, model assets can be inventoried and re-used across the organization. The matrix below highlights the key features of both product editions.

Feature	erwin Data Modeler Standard Edition	erwin Data Modeler Workgroup Edition
Visualization of complex data structures	✓	✓
