

Camtasia®

Screen Recording & Video Editing

A powerful, yet easy-to-use screen recorder, Camtasia helps you create professional videos without having to be a video pro. Easily record your screen movements and actions, or import HD video from a camera or other source. Customise and edit content on both Mac and Windows platforms, and share your videos with viewers on nearly any device.

Illustrate Your Point with Video!

Includes Support for Green Screen effects!

TechSmith Relay™

Seamless Presentation Capture

With just three clicks, you can capture and share your knowledge. Record audio and on-screen activity during lectures, presentations & meetings, and encode on your own server. Host content wherever you like, and share easily to places you know, including your own website, YouTube and more.

In the Workplace

- Capture, catalogue & store internal knowledge.
- Training employees with ease.
- Create and share videos securely with co-workers and clients.

In Education

Improve student achievement and digital literacy in measurable ways with lecture capture, flipping, online learning and more.

Camtasia®

A powerful, yet easy-to-use screen recorder, Camtasia helps you create professional videos without having to be a video pro. Easily record your screen movements and actions, or import HD video from a camera or other source. Customise and edit content on both Mac and Windows platforms, and share your videos with viewers on nearly any device.

Illustrate Your Point with Video

Show your ideas, spread the word, or share knowledge with a video. From quick video demos to extensive video projects, Camtasia has all the editing tools to create the great video content you need to get the job done. Quickly record your webcam or screen, engage your viewers with a variety of effects, and easily share your videos to anyone, anywhere.

Record it All

Camtasia is a powerful video creation tool that allows you to capture anything on your screen. Or, import camera video, music, photos, and more to truly customise your videos.

Create Dynamic Videos

Edit and enhance your videos with Camtasia's professional video editor, ready-to-use themes, animated video backgrounds, graphics, callouts, and more.

Share Your Work

Produce interactive videos with clickable links, tables of contents, search, and more. Then, easily share videos, so your viewers can watch anywhere, anytime.

Edit Video Faster

Create more professional videos without having to be a video pro. Superimpose yourself into your videos, use the media asset library to look like a design genius, and keep your audience's attention with a variety of effects.

Multi-track Timeline

Construct engaging videos faster with multiple video and audio tracks. The ability to easily manipulate, overlay, and group objects helps you produce creative, professional-looking videos.

Visual Effects

Call attention to important details with TechSmith's SmartFocus (or cover up sensitive information with the video blur tool), use Clip Speed to make your videos the perfect length, or use our screen drawing tools to telestrate your videos.

Green Screen Effect

Use the green screen feature (also known as Remove a Color) to put yourself in your video making it appear like you're right in the action.

Animate Content

Captivate viewers with animated content that helps guide them through your videos. Easily make callouts fly across your screen, an image bounce up and down, text scroll, and more.

Organisation-wide video creation and hosting

Roll out interactive videos across your organisation with Relay's video creation and hosting system.

Record videos on any Mac or PC from anywhere in your organisation.

Just press record

Record your own videos with just a few clicks. Make videos at work, home, or on-the-go. Create custom content or use videos and images you already have on your phone or computer to maximise your resources. You can even bring in files from Snagit and Camtasia.

Share easily

Share images and videos with just one person or larger group, securely within your organisation. Upload your existing files in batch, or one at a time. Send a link in an email, or output to YouTube, Kaltura, Ensemble, or your own website.

Watch and re-watch

TechSmith Relay Integrates with popular hosting solutions, so you can make the most of your content. Access videos and images conveniently, on your favourite devices - PC, Mac, iPod, iPad, smartphone, Chromebooks, and more. Replay videos as much as you want, for effective training at your own pace and concept mastery in the classroom.

Mobile-friendly

Capture videos with your mobile device and bring them into TechSmith Relay (Self-Hosted). The TechSmith Fuse app lets you easily upload your content using your own network's wifi, for a seamless, cord-free experience. Plus, you can create and share content from your iPad with Knowmia Teach and Teach Pro by TechSmith.

Secure access

Since you encode and host videos on your own server, you always keep your content right where you need it. LDAP/Active Directory Integration lets you sync profiles to login with confidence and ease, from anywhere in your organisation.

Enterprise-wide Video Sharing and Media Hosting

Easily capture presentations, important meetings, field visits, or training material. Give everyone in your organisation the power to share ideas and knowledge seamlessly, even from their mobile device.

Increase productivity with better training

Streamline your training programs by creating on-the-spot, custom video lessons about topics specific to your company. Train new hires, explain new systems and procedures, and transfer knowledge easily from one employee to another. Keep track of who's watching with real-time viewership and feedback.

Seamless Lecture Capture

TechSmith Relay allows instructors to record lectures without interrupting their classroom. The software works completely in the background, recording their screen and automatically sending finished recordings to the cloud, so they can be shared with the class.
