

Localize courses 3x faster

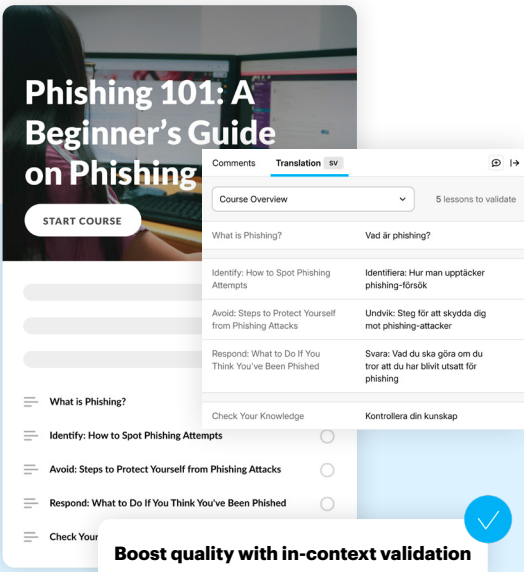

Translate, validate, and manage global e-learning with Articulate Localization

Companies that localize training see stronger employee engagement, productivity, and retention. Yet many companies under-translate or don't localize employee, customer, and partner training at all. It's no surprise when existing tools are slow, inconvenient, and resource-intensive.

Create high-impact e-learning content for global audiences with integrated localization.

- **Faster AI translation.** Accelerate localization with multiple-language batch translations, complete in seconds.
- **Better review process.** Validate translations in context for faster, easier, and better quality feedback.
- **Streamlined, familiar workflows.** View, manage, and publish multiple language versions as one item, all within your Articulate 360 workflows.

Articulate Localization is a comprehensive, end-to-end solution that's built for training. The transformative, AI-powered solution makes it faster and easier than ever to localize learning.

The screenshot displays the Articulate Localization interface. On the left, a course titled "Phishing 101: A Beginner's Guide on Phishing" is shown with a "START COURSE" button. A translation overlay is active, showing a comparison between the original English content and its Swedish translation. The overlay includes a "Comments" tab, a "Translation" tab, and a "sv" language selector. It lists 5 lessons to validate. The content being translated is a phishing awareness module with sections like "What is Phishing?", "Identify: How to Spot Phishing Attempts", "Avoid: Steps to Protect Yourself from Phishing Attacks", and "Respond: What to Do If You Think You've Been Phished". The Swedish translation is shown in a side-by-side comparison. A blue checkmark icon is visible in the bottom right corner of the overlay.

Boost quality with in-context validation

Localize 3x faster

“With Articulate Localization, our translation timeline went from 3 weeks to less than 5 minutes, validation went from 3 weeks to 2-3 hours, and start-to-end localization went from 7 weeks to 3 weeks.”

—Shirley Vera Rivera, Team Lead, Learning Specialists

Translate in seconds. Use AI to translate Rise and Storyline courses over 100x faster from within Articulate 360

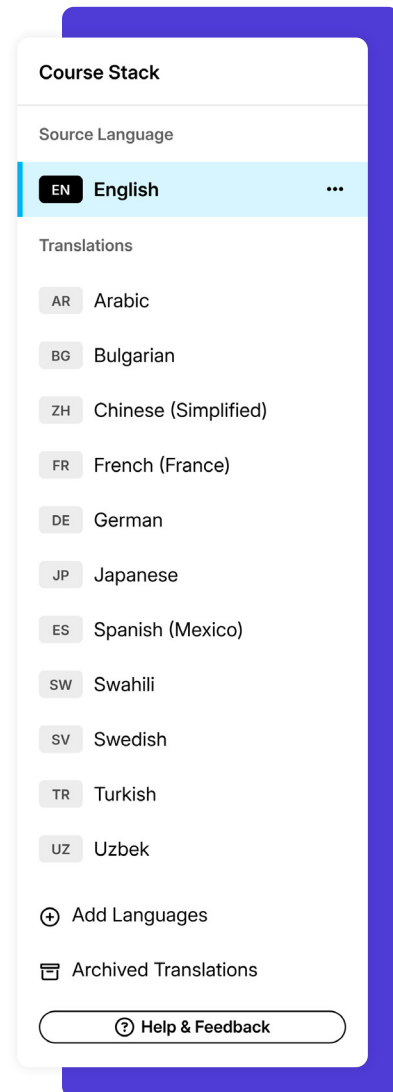

- ✓ 70+ languages available including right-to-left language support
- ✓ Reduce errors and boost consistency with a custom glossary
- ✓ Skip exports and platform switching—no need for separate XLIFF files
- ✓ Translate an entire course or update sections

Get high-quality validation, fast. Invite validators to share in-context feedback in the online Review app

- ✓ Send all language versions simultaneously for review and edits
- ✓ Validate with fewer rounds of feedback—no screenshots required
- ✓ Import suggested edits directly into Rise and Storyline
- ✓ Jump to potential text layout issues in Storyline

Easily manage multi-language courses. Say goodbye to manual repetition.

- ✓ Manage multi-language courses as one item
- ✓ Publish multi-language Storyline projects as a single package to an LMS
- ✓ Publish multiple or all language versions with a few clicks
